

INCIDENT REPORT

Controlled demonstration record for local testing

Incident ID	INC-DEMO-2026-003
Classification	Internal - Fictional demonstration
Title	Confined Space Permit Deviation
Date / time	2026-09-07 08:20
Asset / location	Vessel V-204, Utilities Area
Severity	Critical procedural deviation
Reported by	S. Rao, Safety Observer S-031

This record is fictional and intended to test upload, OCR, evidence retrieval, incident analysis and supervisor review. It does not authorize work or establish a site procedure.

1. Event description

A contractor team was preparing to enter a vessel while the entry permit displayed an expired gas-test timestamp. The entry supervisor identified the mismatch before entry and stopped the activity. No person entered the vessel under the expired reading.

2. Immediate actions

Stop entry; withdraw the crew; suspend the permit; notify the permit issuer; repeat atmospheric testing with calibrated instruments; confirm isolation and rescue readiness.

3. Recorded evidence

Permit timestamp was outside the site-defined validity interval. The isolation certificate was present, but the attendant briefing record was incomplete. The rescue tripod was available at the access point.

4. Proposed follow-up

Reissue the permit only after a complete verification; conduct a focused contractor briefing; audit the permit handover process; require safety supervisor sign-off before any entry.

5. Review fields

Supervisor disposition: _____ Date: _____

Safety review required: Yes / No Work authorization required: Yes / No

Source documents attached: Yes / No Evidence verified: Yes / No
