

INCIDENT REPORT

Controlled demonstration record for local testing

Incident ID	INC-DEMO-2026-001
Classification	Internal - Fictional demonstration
Title	Dropped Load Near Miss - Tank Farm Maintenance
Date / time	2026-09-03 10:35
Asset / location	Mobile maintenance crane MC-04, Tank Farm B
Severity	High potential near miss
Reported by	R. Menon, Technician T-2041

This record is fictional and intended to test upload, OCR, evidence retrieval, incident analysis and supervisor review. It does not authorize work or establish a site procedure.

1. Event description

During removal of a valve actuator, the suspended load rotated unexpectedly after a temporary tag line detached. The actuator descended approximately 0.6 m and landed inside the barricaded exclusion zone. No person was inside the zone and no injury occurred.

2. Immediate actions

Stop work; lower and secure the load; isolate the crane; preserve the lifting arrangement; brief the crew; notify the area supervisor and safety representative.

3. Recorded evidence

Tag line knot was not secured with the specified secondary connection. The pre-lift briefing did not record a wind check. Barricade was present and remained intact.

4. Proposed follow-up

Reinspect the lift plan and rigging; quarantine the tag line; verify competent rigger assignment; repeat toolbox briefing; record supervisor release before restarting.

5. Review fields
